

My life.

My name's Ilga Fileva. I live in Russia, Perm. I'm 15. My address is 34 Kolomenskaya Street. I live with my parents. Their names are Alexandr and Zina. They are not very young. I love my parents very much. They are careful, kind and clever. I get on well with my parents. My mum has got dark short hair and works in the fish factory. My dad works in a plant.

I go to school number 81. This year I graduate from the ninth form. I love my class. My school day starts at half past six. I get up, clean my teeth, have breakfast and walk to my school. Classes usually begin at eight o'clock. I have 6 lessons every day. My favourite subject is History. I dislike Chemistry. After classes I come back home and have lunch. After lunch I work on the computer, do my homework or watch TV.

In my free time I sometimes go to the cinema because I'm very interested in cinema, meet my friends, skate.

There are lots of good things in my life. I like sport, skating. I've got many friends. I adore music and cinema. In summer I can go to the sea.

But not everything is good. I dislike to go to school. I hate Chemistry.

After finishing the ninth form, I'd like to enter lyceum number 2. It's my dream.
